The IDK ICP-9401 four Window Multi-Window Processor is a powerful, high resolution graphics processor that enables the simultaneous display of four images on a single screen with any layout. The ICP-9401 can also be used as 5 digital (HDMI) and 4 analog inputs Truly Seamless Presentation Switcher with using cut, dissolve, and wipe switching effects (while not using multi-window).

Video signals HDMI, DVI, Composite Video, S-Video, Analog RGB, and Analog YPbPr can be input and converted up to QWXGA or 1080p.

Audio signals of IN1 to IN5 are switch-selectable between digital audio (HDMI) and analog audio (RCA), and audio output is simultaneous output both digital and analog output. Sound level of input and output can be set respectively. Gaps between video and audio can be compensated by Lip Sync.

Front Panel LCD Menu is a useful for checking input and output signal status on the switcher and set or changes the settings of the switcher to support AV systems in a field. The ICP-9401 also has other features such as built-in scan converter, Seamless Switching, and Aspect Ratio Control for complete AV switching and distribution.

### Specification

<table>

(*1) This product supports 30 bits/pixel Deep color (10 bit/component). It does not support x.v.Color, 3D, ARC, and HEC.

(*2) Transmission distance depends on connected equipment. The information above is maximum transmission distance when a cable made by IDK (AWG24) is used and signals (1080p/60 24bit / pixel (8 bit / component)) are transmitted (both inputs and outputs of this product). When connected equipment is not matched to this product or other makers’ cables are used, video signal can be unstable or video signals cannot be output, even though transmission distance is within the information above.

(*3) Seamless Switching has one black frames or back color.

(*4) The Anti-Snow function can automatically recover from snow-noise that is a specific symptom of digital signals having HDCP. Mainly, this snow-noise occurs during system startup. Therefore, this function does not work in case of snow-noise has already occurred before input the signal to IDK switchers or bad quality signal transmission.

(*5) The Connection Reset function can fix these problems without physical cable manipulations. This function can work only in this product’s output port, which sometimes will not take effect if another device is between output of this product and display device.

(*6) Pin 2 ~ Pin 21 and Pin 27 ~ Pin 46 supports up to DC 48 V/50 mA. Pin 22 ~ Pin 24 supports up to DC 48 V/1 A.

(*7) Displays that are used with this product must support CEC. Some displays cannot be controlled by this product through CEC.

ICP-9401 Diagram and Features

[Block Diagram]

[Features]

Video
- Up to QWXGA (RB)* or 1080p
- Digital cable equalization
  - Input: Up to 33 ft. (10 m) to 98 ft. (30 m)
  - Output: Up to 33 ft. (10 m) to 164 ft. (50 m)
- Scan conversion
- Aspect Ratio Control
- Truly Seamless Switching (while not using multi-window)
- A/D conversion
- Anti-Snow
- Front panel LCD menu for setup and signal status check

Audio
- A/D, D/A conversion
- Volume adjustment
- Lip Sync

Image Combining
- Simultaneous display of up to 4 input images on a screen
- Picture-in-picture adjustments
  - Window background color
  - Window display priority
  - Window display ON/OFF
  - Window positioning & sizing
  - Displaying window borders
  - Setting window title characters
- Cut/fade switching effects
- Multiview layout registration

Control Input
- RS-232C, LAN

Control Output
- Control command output (controlling projector, etc.)
- PJLink
- Power control of sink device over CEC

Others
- EDID emulation
- Audio breakaway enables independent audio and video switching
- Last memory
- Connection Reset
- Security lock

* (RB) = Reduced Blanking
