The IDK MSD-7202UHDTB is a high-performance digital multi switcher with a scan converter and up to 9 inputs and 2 outputs.

For video input, 9 digital and 2 analog inputs are included and the following signals are supported: HDMI, DVI, composite video, Y/C, analog RGB, and analog YPbPr signals. Input video signals are converted to HDMI and these signals are output at a resolution up to 4K@60.

For audio input, 9 digital and 9 analog inputs are included. Selected audio signals are output to digital audio and analog audio. Audio level of each input can be set individually. The lip sync function corrects the gap between the video and audio.

This switcher also has two RS-232C ports and a LAN ports as communication ports for control to enable you to set menus remotely. You can also control external devices that are connected to the MSD-802UHD over RS-232C, LAN, CEC, or contact closure by registering external control commands. The waiting function helps you to send external commands after cooling time passes as power supply control of projectors or the like. External control commands can be executed from front keys, RS-232C, or LAN; they can also be executed when input channel selection keys or power supply key is operated.

</tr>
</tbody>
</table>

*1 30 bit / pixel (10 bit / component) Deep Color is supported while x.v.Color, 3D, ARC and HEC are not supported.<br>*2 4K format: Only CEA-861 timing is supported.<br>*3 The maximum cable distance varies depending on the connected devices and was measured under following conditions:<br>- 1080p@60: when IDK’s 18 Gbps supported cable was used and signals of 1080p@60 24 bit / pixel (8 bit / component) was input or output.<br>- 4K@60: when IDK’s 18 Gbps supported cable was used and signals of 4K@60 24 bit / pixel (8 bit / component) was input or output.<br>*4 Seamless switching with a black frame.<br>*5 The anti-snow feature automatically fixes snow noise that is a specific symptom of HDCP-compliant signals and mainly occurs at start-up. This feature does not work when snow noise has already occurred during startup or when it occurs due to a bad condition of the transmission line.<br>*6 For digital systems, some problems, such as an HDCP authentication error, can often be recovered by physically disconnecting and reconnecting the digital cables. However, the Connection Reset feature will fix these problems automatically without the need to physically plug and unplug the cables. It creates the same condition as if the cable were physically disconnected and reconnect. This feature only works for the MSD’s output. If other devices are connected between the MSD’s output and sink device, this feature may be invalid.<br>*7 The sink device must support CEC. Some sink devices cannot be controlled from the MSD through CEC.

### Diagram

- **Video Matrix switch**: 2 chs
- **Scan converter**: 2 chs

**MSD-7202UHDTB**

*Maximum extension distance*
- Up to 98 ft. (30 m): 1080p@60
- Up to 39 ft. (12 m): 4K@60 (when 18 Gbps high-speed cable is used) (IN1, IN2, IN3 and OUT1 only)

**Application Example**

- **PC**: HDMI / DVI (Up to 98 ft. (30 m))
- **Laptop**: HDMI / DVI (Up to 98 ft. (30 m))
- **Blu-ray player**: HDMI / DVI (Up to 98 ft. (30 m))
- **Blu-ray player**: Composite video / YC / Analog RGB / Analog YPbPr (Up to 98 ft. (30 m))
- **4K TV**: HDMI / DVI (Up to 98 ft. (30 m))
- **4K projector (PJLink)**: HDMI / DVI (Up to 98 ft. (30 m))

*Maximum extension distance*
- Up to 98 ft. (30 m): 1080p@60
- Up to 39 ft. (12 m): 4K@60 (when 18 Gbps high-speed cable is used) (IN1, IN2, IN3 and OUT1 only)
[Features]

■ Video
  • Up to 4K@60 (4:4:4)
  • HDCP 1.4 / 2.2
  • Scan conversion
  • Aspect ratio control
  • Seamless switching
  • A/D conversion
  • Anti-snow

■ Audio
  • A/D, D/A conversion
  • Volume adjustment
  • Lip sync

■ Control Input
  • RS-232C
  • LAN

■ Control output
  • Control command output (controlling projector, etc.)
  • PJLink
  • Power control of sink device over CEC
  • Contact closure

■ Others
  • EDID emulation
  • All functions setting through browser
  • Automatic input detection and switching
  • Audio breakaway enables independent audio and video switching
  • Cross point memory
  • Preset memory
  • Last memory
  • Connection Reset
  • Security lock

*Seamless switching with a black frame.
