The IDK MSD-502 is a high-performance digital multi switcher with a scan converter and up to 5 inputs and 2 outputs. Video signals HDMI, DVI, Composite Video, S-Video, Analog RGB, and Analog YPbPr can be input and converted up to QWXGA or 1080p. An HDMI output and an HDBaseT output that can output simultaneously, and the MSD-502 has two pairs of this simultaneous output unit. The MSD-502 also has 3 digital and 5 analog audio inputs. Audio signals of IN1 to IN3 are switch-selectable between digital audio (HDMI) and analog audio (RCA), and audio output is simultaneous output both digital and analog output. Sound level of input and output can be set respectively. Gaps between video and audio can be compensated by Lip Sync. Front Panel VFD Menu is a useful for checking input and output signal status on the switcher and set or changes the settings of the switcher to support AV systems in a field. The MSD-502 also has other features such as built-in scan converter, Seamless Switching, and Aspect Ratio Control for complete AV switching and distribution.

**Specification**

*5 The maximum cable distance varies depending on the connected devices and was measured under following conditions:

- RJ-45 (HDBaseT output connector) is only for extending digital video and audio signals over a Cat5e/Cat6 cable. Use it with IDK's category cable receiver. Do not use it for LAN T568A or T568B straight. The CAT.5E HDC cable is developed by IDK and recommended by HDBaseT alliance.

*6 The maximum transmission distance was obtained when IDK's CAT.5E HDC cable was used. The distance may not be extended with some device combinations, cabling method, or other manufacturer's cable. Video may be disturbed or may not be output even if signals are within the range mentioned above. Operations may not be stable with some LCD devices; please check the operation beforehand or contact us. The maximum transmission distance is the shorter distance of connected HDBaseT product or sink device's maximum transmission distance.

*7 Seamless switching with a black frame.

*8 The anti-snow feature automatically fixes snow noise that is a specific symptom of HDCP-compliant signals and mainly occurs at start-up. This feature does not work when snow noise has already occurred during startup or when it occurs due to a bad condition of the transmission line.

*9 For digital systems, some problems, such as an HDCP authentication error, can often be recovered by physically disconnecting and reconnecting the digital cables. However, the Connection Reset feature will fix these problems automatically without the need to physically plug and unplug the cables. It creates the same condition as if the cable were physically disconnected and reconnected. This feature only works for the MSD's output. If other devices are connected between the MSD's output and sink device, this feature may be invalid.

*10 The sink device must support CEC. Some sink devices cannot be controlled from the MSD through CEC.

MSD-502
## Diagram

- **Digital video/audio**
  - HDMI DVI: 3 Inputs (IN 1 to IN 3)
  - Analog Video: 2 Inputs (IN 4 to IN 5)
  - Analog audio: 5 Inputs (IN 1 to IN 3, IN 4 to IN 5)
- **Video matrix switch**
- **Scan converter**
- **Audio matrix switch**
- **Lip Sync**
- **A/D conversion**
- **Audio Breakaway for independent audio and video switching**
- **EDID emulator**
- **EDID conversion**
- **Input EQ**
- **Output EQ**
- **Distribution**
- **Transmitter**
- **Equalizer (EQ)**
- **CPU**
- **HDBaseT**
- **Digital video/audio**
  - HDMI DVI: 2 Outputs
  - Communication: 2 Outputs

## Features

### Video
- Up to 1080p/QWXGA (Reduced Blanking)
- Automatic input signal equalization
- Input: Up to 98 ft. (30 m)
- Output: Up to 164 ft. (50 m)
- Up to 328 ft. (100 m) over Cat6 cable
- Motion adaptive interlaced/progressive conversion
- Scan conversion
- Aspect ratio control
- Seamless switching with one black frame
- Analog/Digital conversion
- Anti-snow

### Audio
- Embedding/De-embedding
- Volume adjustment (Input/Output)
- Lip Sync
- Audio Downmix

### Control Input
- RS-232C
- LAN

### Control Output
- Control command output (e.g. controlling projectors)
- PJLink
- CEC (Control sink device power)

### Others
- EDID emulation
- Audio breakaway for independent audio and video switching
- Input channel automatic switching
- Front panel HDMI input connector
- Crosspoint memory
- Preset memory
- Last memory
- Connection Reset
- Front key function lock
- HDBaseT: RS-232C, LAN and CEC are supported
