The HDC-TH200 is an HDBaseT transmitter that features both HDMI/DVI and analog input signals. It also acts as a simple switcher, automatically sending and switching to an active input. The HDC-TH200 can also embed the analog video into the digital stream. Pair with any of IDK’s HDBaseT receivers for video and audio extension to 328 ft. (100 m).

*1 30 bit/pixel (10 bit/component) and 36 bit/pixel (12 bit/component) Deep Color are supported while x.v.Color, 3D, ARC and HEC are not supported.
*2 HDCP-compliant DVI signals are not supported. To transmit these signals, use our extender which supports DVI signals or MSB-402.
*3 RJ-45 (HDBaseT output connector) is only for extending digital video and audio signals over a Cat5e/Cat6 cable. Do not use for LAN devices.
*4 T568A or T568B straight. The CAT.5E HDC cable is developed by IDK and recommended by HDBaseT alliance.
*5 RJ-45 (HDBaseT output connector) is only for extending digital video and audio signals over a Cat5e/Cat6 cable. Do not use for LAN devices.
*6 The maximum cable distance varies depending on the connected devices and was measured under following conditions:
  - 1080p@60: When IDK’s 24 AWG cable was used and signals of 1080p@60 24 bit/pixel (8 bit/component) was input or output.
  - When the maximum cable distance depends on the connected devices. The distance may not be extended with some device combinations, cabling method, or other manufacturer’s cable. Video may be distorted or may not be output even if signals are within the range mentioned above. Operations may not be stable with some LCD devices; please check the operation beforehand or contact us.
  - The maximum transmission distance is the shorter distance of connected HDBaseT product or sink device’s maximum transmission distance.
  - Up to 492 ft. (150 m): 1080p (24 bit) in Long reach mode. For Long reach mode, use IDK’s HDBaseT Products that supports 328 ft. (100 m) or longer.
*7 The anti-snow feature automatically fixes snow noise that is a specific symptom of HDCP-compliant signals and mainly occurs at start-up. This feature does not work when snow noise has already occurred during startup or when it occurs due to a bad condition of the transmission line.
*8 For digital systems, some problems, such as an HDCP authentication error, can often be recovered by physically disconnecting and reconnecting the digital cables. However, the Connection Reset feature will fix these problems automatically without the need to physically plug and unplug the cables. It creates the same condition as if the cable were physically disconnected and reconnect. This feature only works for the MSD’s output. If other devices are connected between the MSD’s output and sink device, this feature may be invalid.

*For long reach mode, video signals up to 1080p (24 bit) can be transmitted to 492 ft. (150 m) at maximum if using with IDK’s HDBaseT products supporting 328 ft. (100 m) transmission.

[Features]

■ Video
  • Up to 1080p/QWXGA (Reduced Blanking)
  • HDCP 1.4
  • 3D Y/C separation for NTSC and PAL signals
  • Automatic input signal equalization
    Input: Up to 98 ft. (30 m)
  • Up to 328 ft. (100 m) over Cat6 cable
  • Anti-snow
  • Up to 492 ft. (150 m) in Long reach mode (1080p 60 Hz 24 bit or less)*1

■ Audio
  • Embedding

■ Communication
  • LAN

■ Control input
  • RS-232C (HDBaseT)

■ Others
  • EDID emulation
  • Input channel automatic switching
  • CEC (Pass-through)
  • Last memory
  • Connection Reset
  • Button security lockout
  • AC adapter with locking mechanism

*1 If exceeding 328 ft. (100 m) in Long reach mode, CAT.5E HDC, Cat5e STP, and Cat6 STP cables are recommended.
