The HDC-TR121UHD is an HDBaseT extender with EDID emulator for sending HDMI, DVI, or HDBaseT input signals at up to 4K@60 over a Category cable without compression or processing.

Input video signal is converted to HDMI and HDBaseT that can be transmitted up to 100 m (328 ft.); 1080p (24 bit) video signals can be sent up to 150 m (492 ft.) in Long reach mode.

The HDMI OUT1 enables down conversion outputting 4K input video at 1080p automatically depending on sink device status. The two video inputs can be controlled by the front panel or an external controller.

For video signal that is distributed to an HDMI/DVI and HDBaseT simultaneously, video/audio can be off for each output.

The HDC-TR121UHD also features Daisy chain for extending and distributing video, audio, and control signals. In addition, digital audio signals can be de-embedded onto the analog output signals. It supports bidirectional RS-232C communication and LAN transmission.

Internal Web pages provide system status for troubleshooting and device monitoring using a browser.

*1 ARC and HEC are not supported.
*2 HDR is supported if external EDID is selected while an HDR-supported sink device is connected for EDID setting or if copied EDID of an HDR-supported sink device is selected for EDID setting. Input HDR signal is output from all output connectors.
*3 3D is supported if external EDID is selected while a 3D-supported sink device is connected for EDID setting or if copied EDID of 3D-supported sink device is selected for EDID setting. Input 3D signal is output from all output connectors.
*4 ARC, HEC and CEC are not supported.
*5 RJ-45 (HDBaseT connector) is only for extending digital video and audio signals over a Cat5e/Cat6 cable. Use it with IDK's HDBaseT Products. Do not use for LAN devices.
*6 For 4K format, the following color depths are supported.
   - 24 Hz/25 Hz/30 Hz: 24 bit, 30 bit, 36 bit (RGB, YCbCr 4:4:4, YCbCr 4:2:2)
   - 50 Hz/59.94 Hz: 24 bit, 30 bit, 36 bit (YCbCr 4:2:2, YCbCr 4:2:0)
   - 24 bit (RGB, YCbCr 4:4:4)
*7 For 4K format, the following color depths are supported.
   - 24 Hz/25 Hz/30 Hz: 24 bit (RGB, YCbCr 4:4:4, YCbCr 4:2:2)
   - 50 Hz/59.94 Hz/60 Hz: 24 bit (YCbCr 4:4:4) and CEA-861
*8 The maximum cable distance varies depending on the connected devices and was measured under following conditions:
   - 1080p@60: When IDK's 24 AWG cable was used and signals of 1080p@60 24 bit/pixel (8 bit/component) was input or output.
   - 4K@60: When IDK's 18 Gbps supported cable was used and signals of 4K@60 24 bit/pixel (8 bit/component) was input or output.
*9 The maximum transmission distance was obtained when IDK's CAT.5E HDC cable was used. The maximum transmission distance depends on the connected devices. The distance may not be extended with some device combinations, cabling method, or other manufacturer’s cable. Video may be distorted or may not be output even if signals are within the range mentioned above.
*10 For digital systems, some problems, such as an HDCP authentication error, can often be recovered by physically disconnecting and reconnecting the digital cables. However, the Connection Reset feature will fix these problems automatically without the need to physically plug and unplug the cables. It creates the same condition as if the cable were physically disconnected and reconnected. This feature only works for the HDC’s output. If other devices are connected between the HDC’s output and sink device, this feature may be invalid.

IDK Corporation
HDC-TR121UHD
[Features]

**Video**
- Up to 4K@60 (4:4:4)
- HDCP 1.4/2.2
- 3D
- x.v.Color
- Up to 328 ft. (100 m) 4K@60 over CAT.5E HDC/Cat5e STP/Cat6 STP cable
- Transmission over Cat5e UTP cable
- Up to 328 ft. (100 m) over Cat6 UTP cable
- Up to 492 ft. (150 m) in Long reach mode (1080p 60 Hz 24 bit or less)
- HDMI Transmission distances:
  - Up to 98 ft. (30 m): 1080p@60
  - Up to 39 ft. (12 m): 4K@60 (when cable supporting 18 Gbps transmission is used)
- No virtual delay (10 μs or less/328 ft. (100 m))
- Each video output OFF
- OUT1 supports down conversion (4K to 1080p)
- Daisy chain connection
- Anti-snow

**Audio**
- De-embedding

**Control Input**
- Point-to-point (bidirectional) and point-to-multipoint (unidirectional) RS-232C communication
- LAN
- HDBaseT: RS-232C and LAN are supported

**Others**
- WEB browser control
- Status notification
- HDMI status display
- I/O signal status display
- Input channel automatic switching
- EDID emulation
- CEC (Pass-through)
- Connection Reset
- Button security lockout
- AC adapter with locking mechanism

1) If exceeding 164 ft. (50 m), CAT.5E HDC, Cat5e STP, and Cat6 UTP/STP cables are recommended.
2) If the 4K format exceeds 230 ft. (70 m), CAT.5E HDC, Cat5e STP, and Cat6 STP cables are recommended.
3) If exceeding 328 ft. (100 m) in Long reach mode, CAT.5E HDC, Cat5e STP, and Cat6 STP cables are recommended.

1) Maximum transmission distances:
   - 98 ft. (30 m): 1080p@60
   - 39 ft. (12 m): 4K@60 (when cable supporting 18 Gbps transmission is used)
2) Maximum transmission distances:
   - 328 ft. (100 m): 4K@60 (4:2:0)
   - 492 ft. (150 m): 1080p (24 bit) in Long reach mode

For long reach mode, video signals up to 1080p (32 bit) can be transmitted to 492 ft. (150 m) at maximum if using with IDK’s HDBaseT products supporting 328 ft. (100 m) transmission.
