Thank you for choosing our product.

To ensure the best performance of this product, please read this user guide fully and carefully before using it and keep this manual together with the product for future reference as needed.

FCC STATEMENT
This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

CE MARKING
This equipment complies with the essential requirements of the relevant European health, safety and environmental protection legislation.

WEEE MARKING
Waste Electrical and Electronic Equipment (WEEE), Directive 2002/96/EC (This directive is only valid in the EU.)
This equipment complies with the WEEE Directive (2002/96/EC) marking requirement. The left marking indicates that you must not discard this electrical/electronic equipment in domestic household waste.
Safety Instructions

Read and understand all safety and operating instructions before using this product. Follow all instructions and heed all warnings/cautions.

**Warning**

### For lifting heavy products:

- **Lifting must be done by two or more personnel.**
  To avoid injury: When lifting the product, bend your knees, keep your back straight and get close to it with two or more persons.

### For installing and connecting products:

- **Do not place the product upon a surface that may give way or that may become unstable.**
  Install the product in a secure and stable place to prevent it from falling and possibly causing injury.
- **Secure the product if installing in locations prone to vibration or movement.**
  Otherwise, it may move unexpectedly or it may fall and lead to injury.

- **Installation work must be performed by professionals.**
  The product is intended to be installed by skilled technicians. For installation, please contact a system integrator or IDK. Improper installation may lead to the risk of fire, electric shock, injury, or property damage.
- **Insert the power plug into an outlet that is unobstructed.**
  Unobstructed access to the plug enables unplugging the product in case of any extraordinary failure, abnormal situation or for easy disconnection during extended periods of non-use.
- **Insert the power plug into an appropriate outlet completely.**
  If the plug is partially inserted, arching may cause the connection to overheat, increasing the risk of electrical shock or fire. Do not use a damaged plug or connect to a damaged outlet.
- **Unplug the product from the AC power source during installation or service.**
  When connecting peripheral devices to this product, unplug all involved devices from outlets. Ground potential differences may cause fire or other difficulties.

### For operating products:

- **Keep out any foreign objects.**
  To avoid fire or electric shock, do not permit foreign objects, such as metal and paper, to enter the product from vent holes or other apertures.

- **For power cable/plug:**
  - Do not scratch, heat, or modify, including splicing or lengthening them.
  - Do not pull, place heavy objects on them, or pinch them.
  - Do not bend, twist, tie or clamp them together forcefully.
  Misuse of the power cable and plug may cause fire or electric shock. If power cables/plugs become damaged, contact your IDK representative.

- **Do not repair, modify or disassemble.**
  Since the product includes circuitry that uses potentially lethal, high voltage levels, disassembly by unauthorized personnel may lead to the risk of fire or electric shock. For internal inspection or repair, contact your IDK representative.

- **Do not touch the product and connected cables during electrical storms.**
  Contact may cause electric shock.

- **Clean the power plug regularly.**
  If the plug is covered in dust, it may increase the risk of fire.
- **The product must be earthed.**
  To reduce the risk of electrical shock, ensure the product is connected to a mains socket outlet with a protective earthing connection.
### If the following problem occurs:

- **Unplug immediately if the product smokes, makes unusual noise, or produces a burning odor.**
  
  If you continue to use the product under these conditions, it may cause electric shock or fire.

- **Unplug immediately if the product is damaged by falling or having been dropped.**
  
  If you continue to use the product under these conditions, it may increase the risk of electrical shock or fire. For maintenance and repair, contact your IDK representative.

- **Unplug immediately if water or other objects are directed inside.**
  
  If you continue to use the product under these conditions, it may increase the risk of electrical shock or fire. For maintenance and repair, contact your IDK representative.

### Caution

### For installing and connecting products:

**Instruction**

- Use and store the product within the specified temperature/humidity range.
- Do not place the product at elevations of 1.24 mi. (2,000 m) or higher above sea level.
- When mounting the product into the rack, provide sufficient cooling space.
- Never insert screws without the rubber feet into the threaded holes on the bottom of the product.

**Prohibited**

- Do not place the product in a location where it will be subjected to high temperatures.
- Do not store or operate the product in dusty, oil smoke filled, or humid place.
- Do not block the vent holes.
- Do not place or stack heavy items on the product.
- Do not exceed ratings of outlet and wiring devices.

**Caution**

- Unplug immediately if the product smokes, makes unusual noise, or produces a burning odor.
- Unplug immediately if the product is damaged by falling or having been dropped.
- Unplug immediately if water or other objects are directed inside.

- Do not handle power plug with wet hands.
- Do not place the product in a location where it will be subjected to high temperatures.
- Do not store or operate the product in dusty, oil smoke filled, or humid place.
- Do not block the vent holes.
- Do not place or stack heavy items on the product.
- Do not exceed ratings of outlet and wiring devices.
- Do not handle power plug with wet hands.

**No wet hands**

- Do not handle power plug with wet hands.

- Do not place the product in a location where it will be subjected to high temperatures.
- Do not store or operate the product in dusty, oil smoke filled, or humid place.
- Do not block the vent holes.
- Do not place or stack heavy items on the product.
- Do not exceed ratings of outlet and wiring devices.

1 Included Items

Ensure that all items below are included in the package. If any items are missing or damaged, please contact IDK.

■ Transmitter
  - HDC-S01U-T  x1
  - AC adapter with screw locking mechanism (6 ft. (1.8 m))  x1
  - Cable clamp  x2
  - 3-pin captive screw connector  x1

■ Receiver
  - HDC-S01U-R  x1
  - AC adapter with screw locking mechanism (6 ft. (1.8 m))  x1
  - Cable clamp  x1
  - 3-pin captive screw connector  x1

HDC-S01U-T (Transmitter) main unit

HDC-S01U-R (Receiver) main unit

AC adapter with screw locking mechanism (6 ft. (1.8 m))

Cable clamp

3-pin captive screw connector
2 About HDC-S

The HDC-S01U-T (transmitter)/HDC-S01U-R (receiver) is an HDBaseT extender for sending HDMI signals up to 328 ft. (100 m) over a Category (CAT) cable without compression or processing. The HDC-S01U-T/R supports video signals at resolutions up to 4K@60 (4:4:4) and is HDCP 2.2 compliant. HDBaseT signal is encrypted robustly by copyright protection technology. Integrator-friendly features include bidirectional RS-232C and LAN communication allowing control commands and status to be sent and monitored. Additionally, the HDC-S01U-T includes a local HDMI output connector for real-time video monitoring.

Notes:
- Use the transmitter and receiver together.
- The EDID of a sink device that is connected to the receiver has a priority. If no sink device is connected to the receiver, the EDID of a sink device that is connected to the transmitter is selected. This conveys a problem that video may not be displayed if the supported resolutions of the connected sink devices are not the same. Connection having a priority is kept unless the receiver connection status is not changed.
- If HDMI output of the receiver is interrupted (receiver turned ON/OFF, cable plugged/unplugged, HDBaseT signal distorted, or the like), HDMI output video of the transmitter (local monitor output) may not be displayed temporarily.
- CEC control between sink devices that are connected to HDMI outputs (local monitor outputs) of a source device and transmitter is not supported.
- Long reach mode or automatic power saving mode (Auto-LPPF) is not supported.
3 Features

■ Video
  • Up to 4K@60 (4:4:4)
  • HDCP 1.4/2.2
  • HDR
  • 3D
  • x.v.Color
  • Maximum extension distance of category cable for HDBaseT
    328 ft. (100 m): 4K@60 (4:4:4) (when CAT6A (U/FTP, 23 AWG) cable is used)
  • HDMI Transmission distances:
    Up to 39 ft. (12 m): 4K@60 (4:4:4) (when cable supporting 18 Gbps transmission is used)
    Up to 66 ft. (20 m): 1080p@60
  • No virtual delay (10 μs or less/328 ft. (100 m))

■ Communication
  • Bidirectional RS-232C (up to 115.2 kbps)
  • LAN (10Base-T/100Base-TX/1000Base-T (Auto Negotiation), Auto MDI/MDI-X)

■ Others
  • DDC buffer
  • Connection Reset pass-through
  • AC adapter with screw locking mechanism

5 Precautions

Before connecting to external devices, follow the precautions below.

5.1 Installation

When installing the HDC-S, please observe the following precautions.

- Do not stack or place one HDC-S directly on top of another HDC-S.
- Do not block vent holes.
- To provide adequate ventilation, maintain sufficient clearances around the HDC-S (1.2 in. (30 mm) or more).
- Consider installing the HDC-S in an environment compatible with the maximum temperature indicated in the specification sheet 32°F to 104°F (0°C to +40°C).

Maintain adequate clearances (1.2 in. (30 mm) or more) as shown below.

5.2 Rack mounting hardware

- Installing on wall or ceiling
  You can install the HDC-S on a wall or ceiling using the optional mounting plate (FP-100).

- For installing the HDC-S in an EIA rack
  We offer optional rack mounting hardware. Please contact us as needed.
5.3 Connection details

When connecting the HDC-S to external devices, observe the following precautions.

- Read manuals for the external devices.
- Before connecting cables to the HDC-S or an external device, dissipate static electricity by touching grounded metal such as equipment racks before handling signal cables. Failure to observe this precaution may result in ESD (electrostatic discharge) damage.
- Power all units off before connecting cables.
- Be sure to fully seat all plugs and connections and dress cables to reduce stress on connectors.

5.4 HDMI cable

When the video is 4K format, the maximum TMDS data rate (transmission speed) is 18 Gbps. If a high-speed HDMI cable is used, the maximum TMDS data rate of 10.2 Gbps can be transferred, and the video cannot be displayed stably.

Please select an 18 Gbps high-speed cable depending on the 4K format. The maximum transmission distance depends on the cable type, source and sink devices. You are recommended to use high quality cables.

<table>

</tr>
</tbody>
</table>

18 Gbps: 18 Gbps high-speed cable; 10.2 Gbps: 10.2 Gbps cable

*Note:* If a cable is extended and a cable joint is used, video may be interrupted or may not be output.
5.5 Securing HDMI cable

Secure HDMI cables using cable clamps to prevent connectors from being accidentally pulled out of ports.

- **Securing HDMI cable using cable clamp**
  - Insert cable clamp.
  - Secure cable to prevent accidental pull out.

- **Removing HDMI cable and cable clamp**
  - Pull out while pressing.
  - Click to release.

Pull out while pressing
5.6 Category cable

To ensure the best performance with category cables, select a high quality category cable type, ensuring that proper pinning and pairing requirements are observed.

- CAT5E, CAT6, CAT6A, and CAT7 UTP/STP can be used, but we recommend CAT6A (U/FTP, 23 AWG).
- There are various types of STP cable. Ensure that the selected STP is suitable.
- With a CAT6A (U/FTP, 23 AWG) cable, up to two cable interconnection points can be used. Cable joint supporting Cat6A (10GBase-T) are recommended. For cable joint, use a cable joint for CAT6A (10GBase-T) or higher cable. For high resolution, video transmission distance may be shortened by about 20%.
- With a CAT6A (F/UTP, 23 AWG) cable, the maximum transmission distance is around 295 ft. (90 m).
- With a 24 AWG-diameter cable, the maximum transmission distance is around 230 ft. (70 m). If using a cable joint, note that there is possibility that signal quality will be deteriorated.
- If signals are transmitted for a long haul or with noise from other devices, use a broadband cable or cable having high shielding performance. Note that specified distances may shorten depending on the conditions within the actual environment.

U: Unshielded, F: Foil shielded, S: Braid shielded, TP: Twisted Pair cable
*CAT.5E HDC cable is manufactured by IDK.

- If using STP cables, connect the FG connector to a local electrical ground bonding point. Without bonding FG to ground, the shielding feature may not effectively eliminate interference. If using UTP cables, it is still recommended that the FG connector be used.
- STP cables are less affected by interference or external noise than UTP cables.
- Keep UTP cables running as straight as possible. Looping or coiling the cable causes signal quality deterioration and video may not be displayed.
- Connectors for HDBaseT are the same as that of eight-core modular connector used for Ethernet, but the transmission system is not the same so that it cannot be connected to Ethernet.
- Pin assignments of HDBaseT connector: T568A or T568B straight
- Do not pull the cable using excessive force.
- Do not bend the cable at a sharp angle. Keep the bend radius four times of the cable diameter or larger.
- Do not clamp or tie the cable tightly; leave some space allowing the cable to move slightly.
- If you use multiple category cables, keep a distance between the cables or not to place the cables closely in parallel.
- Do not place the cable in an electrically noisy environment, since high-speed impulsive noise may couple into the category cable. Use of a high-output radio transmission device near the HDC-S or remote receivers may interfere with or interrupt video and or audio signals.
5.7 LAN cable

Pin assignment of the LAN connector is as follows. Communication speed is 10Base-T / 100Base-TX / 1000Base-T (Auto Negotiation), and Auto MDI/MDI-X is supported.

- Illuminates in orange if the send/receive rate is 10000 Mbps. Goes off if it is 10 Mbps/100 Mbps.
- Illuminates in green while link is established. Blinks in green while data is being sent/received.

*1 1000Base-T: Bidirectional communication for all 8 pins.
*2 For 10Base-T and 100Base-TX, separate signal lines are used for transmitting (TD) and receiving (RD).

**Note:**
LAN connectors of the transmitter and receiver are connected as network. If both LAN connectors are connected to the same network, communication problem occurs due to loop connection.
5.8 RS-232C cable

The maximum communication speed is 115.2 kbps. Insert and secure the wires from the RS-232C cable into the supplied 3-pin captive screw connector, and then insert the captive screw connector into the mating connector on the HDC-S. 28 AWG to 16 AWG conductor gauge is recommended. The recommended wire strip length is 0.28 in. (7 mm). Short RTS/CTS and DTR/DSR as needed.

5.9 RS-232C communication function

When the HDC-S is powered ON, RS-232C communication is not available until the link between the HDC-S and connected devices are established. When the HDC-S is powered OFF, unintended data may be output. Special consideration would be needed for designing control program.
5.10 AC adapter with screw locking mechanism

The shapes of AC plugs with screw locking mechanism vary from country to country. The AC plug can be removed from the AC adapter.

Removing AC plug:
Slide the AC plug (②) from the AC adapter while holding down the portion mentioned below (①).

Attaching AC plug:
Gently slide the AC plug into the AC adapter (③) until it clicks (④).

</table>

\(^1\) Required to be used the transmitter and receiver together. Since high-speed signal is transmitted, do not install the transmitter and receiver in an electrically noisy environment. Especially, use of a high-output radio transmission device near the HDC-S may interfere with or interrupt video and or audio signals. Long reach mode or automatic power saving mode (Auto-LLPF) is not supported.

\(^2\) HEC or ARC is not supported. CEC from a source device to sink device is not supported. For CEC, control between sink devices that are connected to HDMI outputs (local monitor output) of source device and transmitter is not supported.

\(^3\) RJ-45 (HDBaseT connector) is only for extending digital video and audio signals over a category cable. Do not connect to a connector having LAN functionality.

\(^4\) The maximum transmission distance varies depending on the connected devices and was measured under following conditions:
- 1080p@60: When IDK’s 24 AWG cable was used and signals of 1080p@60 24 bit/pixel (8 bit/component) was input or output.
- 4K@60: When IDK’s 18 Gbps supported cable was used and signals of 4K@60 24 bit/pixel (8 bit/component) was input or output.

The maximum cable distance depends on the connected devices. The distance may not be extended with some device combinations, cabling method, or other manufacturer’s cable. Video may be disturbed or may not be output even if signals are within the range mentioned above.

\(^5\) The maximum transmission distance was obtained when CAT6A (U/FTP, 23 AWG) cable was used. 250 ft. (70 m) if IDK’s CAT.SE HDC cable is used. The distance may not be extended with some device combinations or cabling methods. Video may be disturbed or may not be output even if signals are within the range mentioned above. T568A or T568B straight.

\(^6\) The HDC-S passes through the Connection Reset function of the device installed before the HDC-S. If other devices are connected between the HDC-S and the sink device, this feature may be invalid.
7 Troubleshooting

In case the HDC-S does not work correctly, please check the following items first. Also refer to manuals for connected devices as well, since they may possibly be the cause of the problem.

- Are the HDC-S and all devices connected to power and powered on?
- Are signal cables connected correctly?
- Are there any loose or partially mated connections?
- Are the interconnecting cables specified correctly to support adequate bandwidth?
- For 4K format, is an 18 Gbps high-speed cable used?
- Are specifications of connected devices matched to each other?
- Are configuration settings for the connected devices correct?
- Is there any nearby equipment that may cause electrical noise/RF interference?

If additional assistance is required, please perform the following tests and then contact us.
